A LOOK BACK ON ESSILOR'S WORLD SIGHT DAY 2016

A record-breaking effort from Essilor teams across the globe in this year's World Sight Day: 60,000 people screened through initiatives in over 50 countries.

But it's not just one day of action: we continue efforts to raise awareness and increase access to good vision as part of our ongoing mission 'improving lives by improving sight'.

Join us in our global campaign by visiting www.lovetoseechange.com. For every person who pledges their commitment, Essilor will donate \$1 towards one of three visual health programs for people in need.

We'd like to thank everyone who gave their time, energy and expertise on this important day of awareness building, and in particular to the eye care professionals and many Group partners who joined forces with Essilor this year. Make a date to join us on 12 October for World Sight Day 2017.
