SUSTAINABILITY IN ACTION ACROSS THE ESSILOR GROUP

Over the last 40 years, Essilor has focused on building a sustainable business worldwide, through putting economic, human, environmental and good governance at the heart of its activities.

In 2014 employees from across the Group were invited to submit their projects to a sustainability awards program. It's aim: to recognize how Essilor people and partners create a positive impact through the work they do and to replicate these where possible in the company.

Over 100 projects involving 500 people from 17 countries were submitted in four categories - people, communities, planet, profit, as well as a special Jury prize for outstanding demonstration of Essilor values in the workplace. The winners came together to celebrate on January 29 this year.
